DANIEL MERINO BENITO

SOFTWARE DEVELOPER

PROFILE

+2 years of experience as a Software Developer, during which I have had the opportunity to work on challenging projects that have improved my skills in both backend and frontend development.

EXPERIENCE

Software Developer at Minsait (Indra)

December 2021 - Present [TELCO, B2B]

RESPONSIBILITIES

- Software development: actively participating in the creation and maintenance of applications and systems, both on the frontend and backend.
- Code quality: writing clean, modular, and well-documented code, and conducting thorough testing to ensure software quality and stability.
- Mentoring and support: providing guidance and support to junior developers.
- Time management and meeting deadlines.
- Direct communication with clients, understanding the product to be developed.
- Technologies: Java (microservices), Spring Boot, Angular, AngularJS, BPM (OSB and SOA), SQL Developer, Jenkins, Clarive, SonarQube, Jira.
- Continuous learning: taking various courses offered by Indra or platforms like Udemy.

KEY ACHIEVEMENTS

- Led the development of TELCO screens for the commercial window in 04-2023.
- Migrated from JDK 1.8 to 17 and from WebLogic to OpenShift, resulting in a performance improvement of 20-30% in microservices integration with the latter.
- Adapted quickly to learn new technologies required for the project, such as BPM (OSB and SOA) and AngularJS.

Software Developer at Golden Soft

July 2021 - October 2021 [CRM. B2C]

RESPONSIBILITIES

- Software development: coding, testing, and debugging.
- Troubleshooting support: assisting in identifying and resolving technical issues and collaborating with senior developers to understand and address challenges during development.
- Technologies: .NET, Angular, SQL Server, and Access.

KEY ACHIEVEMENTS

- Developed the BATUZ system for tax control of all companies and subjects under Bizkaia regulations.

Forensic IT Specialist at Grant Thornton Advisory

April 2021 - June 2021 [Consulting, B2B]

RESPONSIBILITIES
- Software development: Java and SQL.
- Acquisition and processing of evidence.
- Other analysis tasks.

KEY ACHIEVEMENTS
- Developed a software tool individually to streamline evidence inventory.

SKILLS

✔ Self-taught	✔ Java	✔ Angular
✔ Teamwork	✔ Spring Boot	✔ AngularJS
✔ Proactive	✔ Android Studio	✔ TypeScript
✔ Time management	✔ BPM (OSB, SOA)	✔ JavaScript
✔ Leadership	✔ Jenkins	✔ CSS / SCSS
✔ Attention to detail	✔ SonarQube	✔ HTML
✔ Problem resolution	✔ SQL	✔ Jasmine andKarma

EDUCACIÓN

Higher Technician in Application Development at Corredor del Henares

September 2019 - June 2021 [Madrid]

LANGUAGES
- Native Spanish
- English B2
