DANIEL MERINO BENITO

SENIOR FULL STACK DEVELOPER

PROFILE

5 years as a Full Stack Developer with solid experience in the design and evolution of B2B software solutions for the insurance and telecommunications sectors. Proficient in backend development with Java and Spring Boot, providing great versatility in frontend frameworks. Accustomed to leading the full product lifecycle, ensuring efficient integrations, vulnerability mitigation, and maximum code quality.

EXPERIENCE

Full Stack Developer at Dev&Del

December 2023 - Present [INSURANCE, B2B]

RESPONSIBILITIES

- **Architecture and Modernization**: Design and implementation of strategic platforms to replace legacy systems, applying Hexagonal Architecture to build scalable solutions with highly decoupled code.
- **Adaptive Full Stack Development**: Building robust B2B solutions using the Spring ecosystem (Boot, Batch, WebFlux) on the backend, with high capacity for adaptation and integration of different frontend frameworks (Vue.js, React) according to product needs.
- **Stakeholder Management (B2B) and Product Definition**: Strategic and constant communication with the client, acting as a technical reference to translate complex business requirements into viable architectural and software solutions.
- **DevSecOps and Code Quality**: Integration of security practices into the development cycle, active vulnerability monitoring, and application of quality standards using SonarQube and Fortify.
- **Technologies**: Java, Spring Boot, Spring WebFlux, Spring Batch, Hexagonal Architecture, Kafka, Openshift, Docker, Jenkins, Vue.js, React, SonarQube, Fortify.

KEY ACHIEVEMENTS

- **Technical Leadership and Rescue (General Co-insurance)**: I led as Tech Lead the deep refactoring, maintenance, evolution, and stabilization of the application, reversing 4 years of technical debt until its first successful pass to production.
- **Radical Performance Optimization**: Refactoring of a critical Spring Batch process, reducing its execution time from 2.5 hours to 30 minutes (an 80% improvement).
- **Rapid adoption and integration of Vue.js and React** into the project stack to modernize the frontend, reducing delivery times.
- **Successful Launch (Reef Project)**: Built from scratch and deployed the first version of the strategic platform to production, strictly meeting delivery deadlines. Implementation based on Hexagonal Architecture using Java 21, Spring Boot, and Kafka.

Full Stack Developer at Minsait (Indra)

December 2021 - December 2023 [TELCO, B2B]

RESPONSIBILITIES

- **Software Architecture and Quality Assurance**: Design, creation, and optimization of complete technological solutions (backend and frontend), ensuring code robustness and maintainability through exhaustive testing and Clean Code standards.
- **Technical Mentoring**: Support, code review, and technical guidance for junior developers on the team.
- **Interlocution and Requirements Gathering**: Direct technical communication with the client to ensure correct functional understanding of the product and align development with business expectations.

- **Tecnologías**: Java (microservicios), Spring Boot, Spring Batch, Angular, AngularJS, BPM (OSB y SOA), SQL Developer, Jenkins, Clarive, SonarQube, Jira.

KEY ACHIEVEMENTS

- **Leadership in the end-to-end development** of critical screens for the TELCO commercial window (04-2023).
- **20-30% performance improvement in microservice integration** through strategic migration from JDK 1.8 to 17 and from WebLogic to OpenShift.
- **Successful integration of BPM tools (OSB and SOA) and AngularJS** to resolve architectural blockages in the project.

Full Stack Developer at Golden Soft

July 2021 - October 2021 [CRM, B2C]

RESPONSIBILITIES

- **Full Stack Evolutionary Development**: Building new functionalities and maintaining modules for the CRM environment, integrating business logic in .NET with dynamic interfaces in Angular.
- **Problem Resolution Support**: Helping to identify and solve technical problems and collaborating with more senior developers to understand and address challenges that arise during development.
- **Technologies**: .NET, Angular, SQL Server, and Access.

KEY ACHIEVEMENTS

- **Integral development of the BATUZ system (.NET/Angular environment)** for taxation control subject to Bizkaia regulations.

Forensic Computer Analyst - Internship at Grant Thornton Advisory

April 2021 - June 2021 [Consulting, B2B]

RESPONSIBILITIES

- **Software Development**: Java and SQL.
- **Acquisition and processing of evidence**.

KEY ACHIEVEMENTS

- **Design and development alone of an internal tool in Java/SQL** that automated and streamlined the inventory of forensic evidence.

EDUCATION

Higher Technician in Application Development at Corredor del Henares

September 2019 - June 2021 [Madrid]

LANGUAGES

- Native Spanish
- B2 English
